1) Ramkumar, J., Vadivel, R.

**Improved Wolf prey inspired protocol for routing in cognitive radio Ad Hoc networks**

DOI: 10.22247/ijcna/2020/202977

2) Shahi, G.S., Batth, R.S., Egerton, S.

**A comparative study on efficient path finding algorithms for route planning in smart vehicular networks**

DOI: 10.22247/ijcna/2020/204020

3) Kiruthiga, G., Mary Vennila, S.

**Robust resource scheduling with optimized load balancing using grasshopper behavior empowered intuitionistic fuzzy clustering in cloud paradigm**

DOI: 10.22247/ijcna/2020/203851

4) Magesh, S., Indumathi, J., RamMohan, R.S., Niveditha, V.R., Prabha, P.S.

**Concepts and contributions of edge computing in internet of things (IoT): A survey**
5) Somashekhara Reddy, D., Chandrasekhar, C.  
**Support vector regressive dragonfly optimized shift invariant deep neural learning based handover for seamless data delivery in heterogeneous network**  

6) Chouhan, P., Jain, S.  
**Multipath routing for internet of vehicles using master of controller in road awareness (MRMOC-IOV)**  

7) Rahim, R., Murugan, S., Priya, S., Magesh, S., Manikandan, R.  
**Taylor Based Grey Wolf Optimization Algorithm (TGWOA) for Energy Aware Secure Routing Protocol**  
8) Kiruthiga, G., Mary Vennila, S.  
**Energy efficient load balancing aware task scheduling in cloud computing using multi-objective chaotic darwinian chicken swarm optimization**  
DOI: 10.22247/ijcna/2020/196040

9) Pokhrel, K., Dutta, N., Ghose, M.K., Sarma, H.K.D.  
**Performance analysis of various mobility management protocols for ipv6 based networks**  
DOI: 10.22247/ijcna/2020/196039

10) Usha, M., Sathiamoorthy, J., Ashween, R., Ramakrishnan, B.N.  
**EEMCCP-A novel architecture protocol design for efficient data transmission in underwater acoustic wireless sensor network**  
DOI: 10.22247/ijcna/2020/195674

11) Osei, A.I., Isaac, A.-M.  
**An Empirical Review on Blockchain Smart Contracts: Application and Challenges in Implementation**  
DOI: 10.22247/ijcna/2020/195718
12) Kaplesh, P.

Performance evaluation of SHA-3(KECCAK) on ARM cortex-A9 and comparison with ARM 7TDMI and Cortex-M4

https://www.scopus.com/inward/record.uri?eid=2-s2.0-85086041924&doi=10.22247/ijcna/2020/191796&partnerID=40&md5=7b585180248508b24e5803e32a4b02ad

13) Araujo, I.I., Kazemian, H.

Vulnerability exploitations using steganography in PDF files
